

# Richard Grinstead

## Front End Developer

---

I aim to provide best in class client experiences by continuously growing front-end development skills while working toward the goal of becoming a full stack developer

## Experience

---

2021 - Current

### **Web Developer *TG Design***

In 2021 started working part time freelance web development to get meaningful experience with JavaScript and JavaScript frameworks beyond personal projects. Gained experience in all areas from design and concept to completion of a project.

2015 - Current

### **Sr. Drafter *Fabcon Precast, LLC***

Strong project team member responsible for completing CAD drafting, organizing and prioritizing projects, and delegating work to other team members to hit production goals. Experienced with working from home with the ability to meet deadlines with minimal supervision. Strong communication with other departments to ensure project deadlines are met.

2012 - 2015

### **Drafter *GPD Group***

Created technical drawings for roadway construction projects. Assisted other departments, even if the work wasn't drafting, so that projects remained on task. A very team-oriented job, I learned the value of working outside of my position to ensure the success of the team.

2010 - 2012

### **Drafter *ECSM Utility Contractors***

Drafted fiber optic network maps across southern Ohio. Gained work from home experience and as a contractor developed skills to work with people and teams outside of my organization.

## Education

---

2008-2010

### **AS in Computer Aided Drafting**

University of Rio Grande and Rio Grande Community College- Rio Grande, OH
